

XM Radio provides more frequent and more comprehensive traffic reporting than any commercial or public radio station. As such, it performs a valuable public service on which I have come to rely.

Second it provides a far greater variety of music programming than any other radio or television station. It respects the diversity of cultures and interests of the many people of this country.

I pay to receive the benefits of XM radio and it should not be up to the National Association of Broadcasters to determine what I may and may not hear. I urge the FCC to REJECT NAB Petition 04-160.

Thank you.
